

BRIAN J. BALES

Los Angeles, CA | Brianbales99@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer experienced in internal production tools, SaaS integrations, workflow automation, and AI-powered applications across entertainment and enterprise environments. Strong in React, JavaScript/TypeScript, Python, Node.js, SQL, REST APIs, and AI-assisted development.

TECHNICAL SKILLS

Core: JavaScript, TypeScript, Python, SQL, Groovy, React, Angular, Flutter, Node.js, Express, REST APIs

Platforms: Salesforce, Supabase/PostgreSQL, Firebase, Vercel, Fly.io, Git/GitHub, Jira, Figma

AI Development: Cursor, Claude, Copilot, Google Stitch, MCP, AI agents, custom rules/Skills, prompt engineering, Replicate

PROFESSIONAL EXPERIENCE

AI Engineer (Contract) | Handshake AI

Jan 2026 - Present

- Evaluate frontier AI outputs for accuracy, technical reasoning, instruction-following, completeness, and implementation defects across coding tasks, image and video generation, prompt evaluations.
- Deliver structured validation and technical feedback that supports model quality and reliability.

Software Engineer | FOX Entertainment

Feb 2025 - May 2025

- Developed React-based internal production tools and iterated UI/UX with stakeholders using AI-assisted development workflows.
- Built integrations connecting Linear task data to custom interfaces and scalable filtering for production datasets.
- Translated production-team workflow pain points into practical features used by internal users.

Software Developer | FOX Corporation

Sep 2024 - Dec 2024

- Built Salesforce Playbook scheduling and workforce tools using JavaScript, Lightning Web Components, Apex, and HTML/CSS.
- Integrated crew availability and project workload data into a unified production-coordination workflow.
- Partnered with engineering, product, and business teams to translate requirements into tested SaaS enhancements.

Software Developer | Highstreet IT Solutions

May 2021 - Dec 2022

- Customized Oracle Student Financial Planning workflows for 1,000+ students using Groovy and SQL.
- Automated financial aid processes and troubleshoot interconnected data and system issues to improve reliability.
- Maintained reliable financial workflows by troubleshooting system issues and improving process accuracy.

SELECTED PROJECTS

Pixloo.AI | *Flutter, Node.js, Supabase, Fly.io, Vercel, Replicate*

- Built a full-stack iOS AI creation platform with external model integrations, backend APIs, authentication, storage, model routing, and media-generation workflows.
- Used Cursor with MCP integrations, agents, custom rules, and reusable Skills to accelerate implementation and debugging.

Dreamcatcher | *Flutter, Supabase, AI APIs, Google Stitch, Cursor*

- Built an AI dream-journal platform with multi-step interpretation and visual-generation workflows, persistent user data, and MCP-assisted design-to-code development.
- Used AI agents and project rules to maintain architecture and UI consistency across the application.

RESEARCH & PUBLICATIONS

IEEE Publication | [CSU ScholarWorks](#) - GA-SFS Hybrid Feature Selection for Biomedical Data

- Designed and published a hybrid GA + SFFS feature-selection algorithm for high-dimensional biomedical data.
- Evaluated feature subsets with SVM and KNN using Python, scikit-learn, NumPy, Pandas, and Matplotlib.

EDUCATION

California State University, Northridge | M.S. Software Engineering

California State University, Northridge | B.S. Computer Science

CERTIFICATION & LANGUAGES

Certified Salesforce AI Associate | English and Spanish (Fluent)
